The diagram shows a 4x8 LED matrix display. The matrix is composed of 32 LEDs (D50-D87) arranged in 4 rows and 8 columns. Each LED is connected to a resistor (R50-R83) and a driver transistor (Q5-Q8). The matrix is connected to a 32.10V supply and a 17V supply. The output lines are labeled EE, FF, GG, and HH.

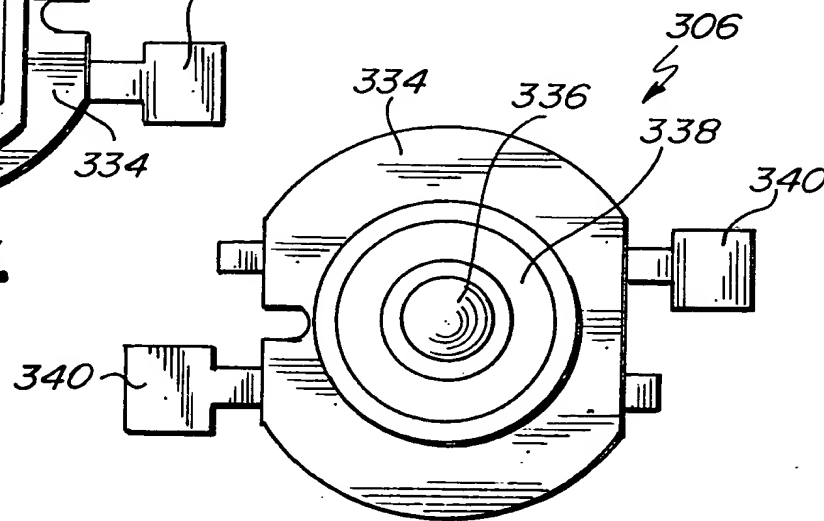

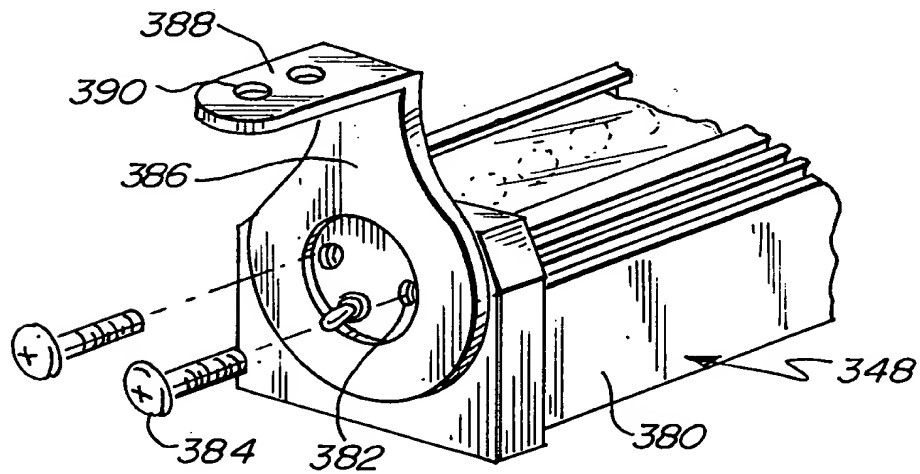

Fig. 49.

A perspective view of a circular mechanical assembly. The assembly features a central shaft (524) with a gear (528) mounted on it. Several rectangular components (532) are arranged around the shaft, each with a curved end (534) that engages with a gear (528) on the shaft. The components are held in place by a ring (530) with a flange (538). A spring (526) is shown compressing against the components. Other labels include 518, 522, and 536, which point to various internal parts and the base of the assembly.
